About us

More and more of us are looking to make our homes and offices that bit smarter. But that doesn't have to mean complicated costly technology. For us it means taking the electrical products we use every day and improving them to make your home or office more comfortable, convenient, and secure.

Our products are designed to help you better manage day to day tasks in your home, office and garden with the minimum of fuss – just plug and play. Whether its app-controlled sockets that let you manage your household from afar, or Wi-Fi enabled LED lights for smarter illumination, Link2Home provides the simple and flexible solution you need.

We strive to be the best in class provider of Smart Electrical products and solutions.

Our Mission

To source innovative yet affordable technology that can be easily introduced into your home, making it work smarter and more efficiently.

Design

Good-looking and clever! Our range is designed to help you better manage day-to-day tasks with the minimum of fuss.

Safety

The highest quality standards mean that your home and connections are safe and secure.

Delivery

The best-in-class provider of Smart Electrical Products and Solutions*.

CONTROL AT YOUR FINGERTIPS

At Link2Home, we make products that are attractive, helpful and easy to use and our app enhances this experience.

Control your Link2Home devices, switch on and off your sockets, see inside and outside your home with our cameras, control your environment with our lights and receive alerts from our doorbells and never miss a visitor. Receive notifications on your phone or tablet whenever motion is detected from an applicable device.

All of our smart devices come integrated with Amazon Alexa and Hey Google smart skills. This means you can link our devices to your existing or new smart speaker and also access our camera devices on your Amazon Echo Show or Google Home Device including Google Chromecast.

Easy Set Up

Set up is easy and possible in as little as 10 seconds using the below set up methods:

Our plugs and lamps incorporate both Wireless and BLE connectivity which means when you open the app the device will pop up without any button press needed. All you need to do is add and confirm your wireless password and the device is added.

Using the manual mode (recommended) for video devices set up takes around 30 seconds with easy to follow on screen instructions.

You can use the Auto Scan feature to scan your network for new devices without manual intervention but note this set up mode can take up to 2 minutes.

Home and member management

You can add multiple homes or locations under one user log in and switch between them easily on the app home screen. You can also share devices and whole homes with other users and control what devices and features they have access to.

Note: All users will require a Free Link2Home Pro app account.

Smart Control – “Automation”

Set up “Automation” tasks for individual devices or a group of devices are triggered external events. These events require no manual trigger and are triggered by external factors including:

Inter-device synchronisation: Activating one product feature when another product feature is activated. Such as turning on a light if camera motion is detected.

External environment: Split into two categories in weather and location.

Under weather changes you can link changes to temperature, humidity, weather, sunrise/sunset and windspeed.

Under location you can link changes to arriving or leaving a specific location.

Schedule: Set events to specific times on specific days.

For example: Set you outdoor lights to come on when you arrive within 500m of your home location and the sun has set.

Smart Control – “Tap to Run”

Using the “Tap-to-Run” settings from the “Smart” menu you can create quick one touch shortcuts to a series of events. These “Tap-to-Run” events are then added as a shortcut in your “Home” screen.

For Example: You could create an event called “Good morning” in this event you can turn on your lights, boil your kettle and turn up your thermostat.

Alarm settings and event recording

All camera devices feature sound and motion detectors and when triggered the app will take a snapshot of the event which is then saved in the apps “Message Center”. You can also manually take snapshots and record video to your local device.

With all camera devices you can add a Micro SD card which will then record a 30 second video direct to the memory card when an alert is detected. These events can then be reviewed in the app’s “Message Center”.

Additionally, through the app you can subscribe to our cloud service* to record events to the cloud which can then be reviewed in the app.

*requires additional purchase.

DOORBELLS

Outdoor battery doorbell

Product Code - L2H-BellBattery

- Outdoor Battery powered Doorbell Camera
- 140° Viewing Angle
- High power LED with ICR
- 1/3" CMOS
- 2 Mega Max picture size: 1920 × 1080
- IR distance: 10m
- Up to 3 months battery life*

*based on 10 activations per day

Outdoor wired doorbell

Product Code - L2H-BellWired

- Outdoor Doorbell Camera
- High power LED with ICR
- 1/3" CMOS
- 2 Mega Max picture size: 1920 x 1080
- IR distance: 10m
- Includes power adaptor with UK plug

- Bell
- Wireless 20m
- Bell 120 dB
- Melodies 4
- USB power supply

Doorbell bell chime

Product Code - L2H-BellChime

- Chime Kit – For use with battery and hardwired doorbells
- Power 5V1A USB
- 4 Selectable Tones
- 20M Wireless range
- 120DB chime – Selectable volume

- Wi-Fi
- See and Speak with Visitors
- Sound And Motion Detection
- 2-Way Audio
- Night Vision
- Supports 1080P HD Video
- Tilt -75°-75° Pan 0-355°

Indoor camera with pan/tilt

Product Code - L2H-CameraPT

- WIFI camera
- Pan/Tilt
- High power LED with ICR
- 1/3" CMOS
- 2 Mega Max picture size: 1920 x 1080
- IR distance: 10m

Indoor camera with flexible installation

Product Code - L2H-CameraFLEX

- Baby/pet Monitor
- Flexible neck for easy mount
- High power LED with ICR
- 1/3" CMOS
- 2 Mega Max picture size: 1920 × 1080
- IR distance: 10m

Night Vision Supports 1080P HD Video Pan 0-355°

Wi-Fi See and Speak with Visitors Sound And Motion Detection 2-Way Audio

Outdoor Wi-Fi camera

Product Code - L2H-ODRCamera

- Outdoor Weatherproof Wi-Fi Camera
- High power LED with ICR for clear Night Vision
- 1/3" CMOS
- 2 Mega 1920 x 1080 HD Sensor
- IR Sensor distance: 15m
- Works with Alexa and Google

 Wi-Fi	 See and Speak with Visitors	 SD Card	 Sound And Motion Detection
 2-Way Audio	 Night Vision	 Supports 1080P HD Video	 Tilt -10°~75° Pan 0~355°

Outdoor Wi-Fi camera with pan/tilt

Product Code - L2H-ODRCameraPT

- Outdoor Weatherproof Wi-Fi Camera
- Pan and tilt action through the app screen
- High power LED with ICR for clear Night Vision
- 1/3" CMOS
- 2 Mega 1920 * 1080 HD Sensor
- IR Sensor distance: 15m
- Works with Alexa and Google

Floodlight with PIR and camera

Product Code - L2H-FloodlightCAM

- Outdoor Floodlight Camera
- 140° Viewing Angle
- Lamp power(W): 12.5W x 2
- High power LED with ICR
- 1/3" CMOS
- 2 Mega Max picture size: 1920 × 1080
- IR distance: 10m

Wi-Fi Smart plug

Product Code - L2H-SMARTPLUG

- Control your appliances from your smart phone from anywhere in the world with an internet connection
- Use your smart phone to set up multiple timer programs, countdown functions easily with more control down to the minute
- Link your plug to events (such as location and weather) and other devices using the in-app automation setting
- Wi-Fi: 802.11 b/g/n
- 13A Single-pole, 230V~, 50Hz
