

PL107N

Non-Contact Voltage Detector

Non-Contact Voltage Detector c/w LED & Audible Indication

The PL107N is a Non contact- optical and acoustic indication of AC voltages between 90-1000V. Clear, omni-directional flashing LED. Quick and accurate detection of cable breaks cables, Phase detection in sockets.

Features

- Contact-free audible and visual indication of AC voltages between 90 and 1000 V AC
- Clear, omnidirectional flashing LED
- Quick and accurate detection of cable breaks
- Detects microwave leakage
- Phase detection in sockets
- Press to test switch avoids nuisance buzzing and

Specifications

| | |
|-----------------------|--------------------------------|
| Voltage | |
| Indication | 1 LED and Audible Buzzer |
| Voltage range | 90 - 1000V AC |
| Operating temperature | -10° to 50°C |
| Overvoltage category | Cat 111 / 600 V |
| Other Information | |
| Power supply | 2 x 1.5 V LR03 (AAA) batteries |
| Dimensions | 150 x 22 x 21 mm |
| Weight | 60g |
